More than three-quarters of students report that they wish they had more help preparing for managing their personal finances. When youth enter the workforce without a basic understanding of financial literacy, they face significant issues, ranging from excessive credit card debt, too little or no savings, even insufficient retirement planning. The financial choices young adults make have a lasting effect on them. It can lead to a lifetime of debt and financial stress or economic stability.

Relevance

In today’s world, financial education is crucial. However, many young people are leaving high school lacking the basic fundamentals of financial literacy. Numerous studies conducted on American youths’ understanding of basic financial concepts consistently reveal that young people don’t possess adequate financial knowledge to be financially proficient in adulthood.

According to a survey from the Hartford Financial Services Group, less than one-quarter of students, about 24 percent, and only 20 percent of parents, say students are prepared to deal with the financial challenges awaiting them in the adult world.

More than three-quarters of students report that they wish they had more help preparing for managing their personal finances.
Financial Literacy Pays Off

With nearly 20% of Americans living beyond their means, education about personal finance is critical. Research indicates that teaching finance to students yield greater money management skills that will carry into adulthood.

Participant Quotes
